

THATAKAM NAGA ADHITHYA

Hyderabad, India | +91-9550468444 | adhithyathatakam683@gmail.com | LinkedIn Profile

Professional Summary

Motivated Computer Science (AI ML) graduate with a strong foundation in Python, SQL, and software development principles. Skilled in data analysis, machine learning, and working with structured datasets to derive meaningful insights. Experienced in building and optimizing models, performing data preprocessing, and solving real-world problems through analytical thinking. Passionate about contributing to data-driven and software development projects while collaborating effectively in team-oriented engineering environments.

Projects

- **Finger Nail Disease Detection System (Python, Deep Learning):** Built a deep learning-based image classification system for fingernail disease detection. Applied **CNN models**, image preprocessing, and data augmentation techniques to improve classification accuracy.
- **Object Detection System (YOLO integrated with OpenCV):** Developed a real-time object detection system using YOLO integrated with OpenCV. Performed dataset labeling, preprocessing, training, testing, and performance optimization. Improved detection accuracy through iterative experimentation and optimization.
- **Pizza sales Analysis (Python, SQL, Excel):** Analyzed pizza sales data to uncover revenue trends, customer preferences, and product performance insights. Developed data-driven solutions to identify top-selling pizzas, peak order times, and category-wise revenue contribution. Applied SQL/Excel techniques such as aggregation, filtering, and joins to optimize sales analysis and reporting. Generated actionable insights to improve inventory planning, pricing strategies, and overall business performance.
- **Customer Support Chatbot (DialogFlow):** Designed and developed an intelligent Chatbot using Dialogflow ES, implementing agents, intents, and entities to automate user interactions. Integrated and tested conversation flows to ensure seamless user interaction. Enhanced automation and user experience by providing accurate, real-time responses.

Skills

- **Programming:** Python, SQL
- **Deep Learning Frameworks:** TensorFlow, Scikit-Learn
- **Libraries:** OpenCV, Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Tools:** Excel, Power BI
- **Platforms:** Google colab

Education

Bachelor of Technology in Computer Science & Engineering (AI & ML)

2025

CGPA: 6.8 / 10

Intermediate (MPC)

2021

Percentage: 92%

Secondary Education

2019

Percentage: 93%

Certifications

- **Data Analytics Job Simulation** — Deloitt
- **Complete Data Analytics Program** — GeeksforGeeks
- **Industrial Program on Artificial Intelligence** — 1Stop
