Profile

Highly motivated AI/ML and Data Science enthusiast with strong foundations in Machine Learning, Deep Learning, and Statistical Analysis. Hands-on experience in building intelligent, human-centric AI systems using computer vision and behavioral data. Passionate about developing ethically responsible AI solutions that enhance productivity, well-being, and real-world decision-making.

Education

TKR College of Engineering and Technology

2021 – 2025

B.Tech in Computer Science and Engineering (GPA: 8.25)

Hyderabad, Telangana

Sri Chaitanya Junior Kalasala

2019 – 2021

Intermediate (Score: 958/1000)

Hyderabad, Telangana

Sri Chaitanya High School

2018 – 2019

SSC (GPA: 10.0)

Hyderabad, Telangana

Technical Skills

Languages: Python, Java

Database: MySQL

Libraries/Frameworks: TensorFlow, OpenCV, MediaPipe, Scikit-learn, Pandas, NumPy

Machine Learning: Supervised Learning, Unsupervised Learning, Deep Learning, Time-Series Analysis

Automation Tools: n8n, Google Forms API, SMTP

Other Tools: XML, Canva, MS Word, MS Excel

Soft Skills: Communication, Teamwork, Organization, Adaptability

Projects

Mental Fatigue Detection System | *Python, OpenCV, MediaPipe, Scikit-learn*

- Developed an AI-based mental fatigue detection system by combining computer vision and keystroke pattern analysis during prolonged computer usage.
- Extracted real-time facial features such as eye blink rate, eye aspect ratio, and head pose using webcam input and MediaPipe.
- Analyzed behavioral signals including typing speed, pause intervals, and error frequency from keystroke dynamics.
- Processed time-series features using machine learning models to classify fatigue states and trigger proactive break recommendations.
- Implemented robust preprocessing, feature normalization, and real-time inference to ensure reliable performance across diverse user conditions.

Real-time Sign Language Detection | *TensorFlow, Python, OpenCV*

- Designed a real-time sign language recognition system translating hand gestures into text or speech.
- Utilized OpenCV for live video capture and TensorFlow for training deep learning models.
- Enhanced accessibility for hearing-impaired users by improving model accuracy through fine-tuning.

n8n Automation Workflow | *n8n, Google Forms, Email Automation*

- Automated course registration confirmation emails using n8n workflows.
- Integrated Google Forms API with SMTP to ensure instant communication and reduced manual intervention.
- Increased workflow reliability using automated error handling and retry strategies.

Certifications & Achievements

- Data Science Certification – ExcelR Institutions Limited
- Completed comprehensive training in Python for Data Science, Statistics, Machine Learning, and Data Visualization.
- Gained hands-on experience in EDA, feature engineering, model evaluation, and predictive modeling on real-world datasets.
